HEALTH & SAFETY MANAGEMENT SYSTEM

A full reset for high-risk or rapidly scaling organisations.

BEST SUITED TO:

High-risk environments, complex operations, or organisations where existing systems are outdated, fragmented, or failing to deliver the required level of control. This may follow internal review findings, regulator intervention, or a desire to achieve a new accreditation.

INCLUDED:

01 Full health & safety management system redesign

02 Legal register and compliance matrix

03 Complete register suite
Risk Assessments, Safe Systems of Work, COSHH, training, policies and more

04 Site-level implementation and training rollout plan

05 Incident investigation and root-cause analysis framework

06 Audit readiness support and regulator engagement assistance (if required)

07 Six months of follow-up monitoring and continuous improvement planning

WHAT THIS DELIVERS:

A complete review and bespoke redesign of your Health & Safety Management System — aligned to ISO 45001 principles — with clear governance, embedded processes, and leadership confidence.

OUTCOMES YOU CAN EXPECT:

A defensible, fully auditable management system

Improved safety culture, performance, and engagement

Continuous improvement built in and monitored through inspections and audits

Delivery timeframe:

10–16 weeks

Typical investment:

From £25,000+
