# AGRICULTURAL FIRM

Regulatory  
Investigation And  
Damage Control

## CLIENT OVERVIEW

A long-established agricultural business operating in a high-risk, hands-on environment.

## CONTEXT CHALLENGE

Following an incident, the company came under regulatory scrutiny. An external investigation was scheduled, and leadership were concerned about how the business would be perceived. They needed to get organised quickly, present the facts clearly and demonstrate that they were a responsible, proactive operator.

# OUR APPROACH

We provided rapid, on-the-ground support to stabilise the situation:

01

Immediate on-site presence ahead of and during the investigation.

02

Preparing the site, documentation and evidence so everything was clear and accessible.

03

Coaching key personnel on how to engage with inspectors confidently and constructively.

04

Supporting interactions with the regulator to keep discussions factual and focused.

Our aim was to ensure the business presented as organised, cooperative and committed to improvement.

# IMPACT

The company appeared prepared, structured and proactive throughout the investigation.

Regulators recognised the business's commitment to managing risk.

The final outcome was less severe than initially expected, potentially saving significant cost and disruption.

## WHY IT MATTERS

This case highlights the value of calm, experienced support when the stakes are high—helping a business navigate regulatory scrutiny with its reputation intact.

# THANK YOU!

Thank you for taking the time to review this case study. Each engagement delivered by Wentworth Safety is approached with discretion, clarity, and a focus on long-term compliance and governance. Our work is designed to support leadership teams in managing risk confidently and meeting regulatory expectations.
